YOUR PARTNERS IN ENERGY EFFICIENCY

Electric Ireland will part fund energy saving projects through the Energy Efficiency Obligation Scheme.

Frontline Energy provides support by identifying energy saving opportunities for your building and business. Below is an overview of how energy saving measures are identified.

**Supporting
Irish Businesses:**

**Leisure and Hospitality
Commercial Building
Owners
Food Processing
Logistics.**

SURVEY your site and building premises - The elements that we focus on include major energy consuming equipment and services and behavioural practices.

MONITOR, TARGETING AND PLANNING

Assumptions that have been previously made are investigated and verified to help formulate a plan. This feeds into the creation of an energy strategy.

MOBILISATION - Implementation of the agreed measures including any project work.

PROJECT PAYBACK - This is the period of time where savings achieved through implementation of energy efficiency initiatives cover the cost of the project.
